

# Section 2

## Logbook Examples

Vessel Targeting Monkfish (ANF) in Area VI and VII - *Sheet 1*

**REMEMBER!** Vessels over 15m (10m in the BSA) targeting demersal species including monkfish, must comply with Effort Reporting requirements in the logbook.

**NOTE!** You must record in the logbook when crossing an effort zone, which you are not going to fish in.

**REMEMBER!** If you are using a unit of storage different to the standard fish box you must fill in the unit used and the net weight in Kg live weight of the unit used.

**REMEMBER!** Always keep the same pattern for each page, especially regarding the columns for each species e.g. If you are using the first column for monkfish ("ANF") on the first page, then put ANF on the identical column on the following pages.

**BEWARE!** The permitted margin of tolerance in estimating quantities in kg on board is 8% for HAKE in Area VI and VII.

**REMEMBER!** Regardless of whether you have fished or not, when entering the BSA a line must be completed in the logbook containing the date and time; position; means of communication; destination of communication **AND CATCH BY SPECIES ON BOARD IN LIVE WEIGHT.** An effort report with this information must also be sent to the FMC.

**REMEMBER!** Always keep the same pattern for each page, especially regarding the columns for each species e.g. If you are using the first column for monkfish ("ANF") on the first page, then put ANF on the identical column on the following pages.

The landing declaration should be completed on the last page used.

**REMEMBER!** If you have fished in two or more ICES Areas during the course of a trip and caught fish in each area then entries relating to the landings from each particular area must be recorded.

(\*) Delete whichever does not apply. Comments : Shifted from Achill to Porcupine due to poor fishing

(\*) Delete whichever does not apply. Comments : \_\_\_\_\_

**NOTE!** Prawn catches should be recorded in live weight. To convert the weight of tails to live weight multiply by three. (EU Reg. 850/98)

**REMEMBER!** Always keep the same pattern for each page, especially regarding the columns for each species e.g. If you are using the first column for prawns ("NEP") on the first page, then put NEP on the identical column on the following pages.

**MAKE SURE** when fishing in an area within 5 nautical miles either side of an effort zone line, a separate line must be filled in the logbook every 24 hours, recording time of first entry and last exit. An effort report with this information must also be sent to the FMC.

Via		Whole		Claws		Estimated total discards (16)	
		2475kg		60kg			
Signature Master/Agent (*) <b>Colin Crab</b>		Agent's name and address (where applicable)					
Comments : <b>Lost string of Pots at 55deg 30'N 8deg 10'W</b>							

NOTE the different code for pots also the different definition of gear dimensions used.

Claws  
CRE  
kgs

NOTE! A maximum of 1% by weight of the total catch of crab on board can be made up in claws. To convert claws to live weight multiply by 5. (EU Reg. 724/2001)

REMEMBER! All vessels using pots, gillnets or longlines must fill in an additional line in the logbook indicating the date and time the gear was shot and the date and time of completion of hauling.

It is very useful for scientific purposes to record the position and amount of any lost gear.

## Vessel Potting for Crab in the Biologically Sensitive Area

**REMEMBER!** Vessels over 10m in the BSA targeting crab must comply with Effort Reporting and recording requirements in the logbook.

**NOTE** the different code for pots also the different definition of gear dimensions used.

**REMEMBER!** Vessels over 10m potting for crab must record entry/exit into the BSA in the logbook and make an effort report to the FMC.

**NOTE!** A maximum of 1% by weight of the total catch of crab on board can be made up in claws. To convert claws to live weight multiply by 5. (EU Reg. 724/2001)

**REMEMBER!** All vessels using pots, gillnets or longlines must fill in an additional line in the logbook indicating the date and time the gear was shot and the date and time of completion of hauling.

**NOTE** the different code for Dredges also the different definition of gear dimensions used. The width of the beam and the number of dredges per side should be recorded.

**REMEMBER!** If you are using a unit of storage different to the standard fish box you must fill in the unit used and the net weight in Kg live weight of the unit used.

# Vessel Targeting Deepwater Species in Area VII

**NOTE!** No effort report is required for vessels targeting Deepwater Species but you do need a special permit issued by DCMNR.

**N° IRL 1120001** EUROPEAN COMMUNITIES' LOG-BOOK

Name of vessel(s) and radio call sign(s) if any (1) **The Abyss EI 1111** External identification (2) **50 1000** Name of master(s) (3) **James Roughy** Address(es) **Killybegs** Day **25** Month **04** Hour **15** Year **2006** Departure (4) **25 04 15** from **Killybegs** Return (5) **02 05 07** to **Fenit** Landing (6) **02 05** at **Fenit**

Gear (8) **OTB** Mesh size (9) **100** Dimension (10) **30Fth**

**BE CAREFUL!** Make sure you use the correct codes for deepwater species and also be careful in converting gutted weights to live weights.

**REMEMBER!** If you are using a unit of storage different to the standard fish box you must fill in the unit used and the net weight in Kg live weight.

**REMEMBER!** If you have fished in two or more ICES Areas during the course of a trip and caught fish in each area then entries relating to the landings from each particular area must be recorded.

Although optional, from a scientific point of view it is useful to fill in the discards for deepwater species regularly.

## Vessels Pair trawling for Albacore Tuna and Landing - *Sheet 1* into France

**NOTE!** No effort report is required for vessels targeting Albacore Tuna but you do need a special permit issued by DCMNR to fish tuna.

**REMEMBER!** When pair trawling the name and registration number of the second vessel, as well as the name of the skipper should be recorded.

Quantities (19)				Whole	Gut	Gut		
Presentation of fish (17)				11,975	185	190		
Quantities (19)				9,450		37		

The permitted margin of tolerance in estimating quantities in kg on board is 20% for Albacore Tuna but be careful you check with your tuna permit regarding by-catch limits for Bluefin Tuna and Swordfish.

**BE AWARE!** When landing into a port of a different Member State i.e France the first copy (pink sheet) of the logsheet and landing declaration should be handed over to the authorities of the Member State within 48 hours of landing. The original of the logbook (white sheet) and the landing declaration should be returned to the Irish authorities within 48 hours of landing. If it is impossible to send on the originals to the Irish authorities, then the information in respect of the landing declaration should be transmitted by radio or other means e.g. fax to the vessel's local Sea Fishery Control Port Office.

The skipper or his agent or both can sign the landing declaration!

## Vessels Pair trawling for Albacore Tuna and Landing - *Sheet 2* into France

**REMEMBER!** When pair trawling the name and registration number of the second vessel, as well as the name of the skipper should be recorded.

Left Union Hall and met up with Bluefin at 47deg 20'W 9deg 40'W

## RELEVANT REGULATIONS FOR THE COMPLETION OF THE EU LOGBOOK

### EU Logbook Regulations

Commission Regulation (EC) No. 2807/83 of 22 September OJ L276 10th October 1983 "Laying down detailed rules for recording information on member states catches of fish", as adopted by SI 170/2006 Sea Fisheries (Control of Catches) Regulations 2006, as amended by  
Commission Regulation (EEC) No. 473/89 of 24th February 1989 (Specifying landing declarations to be submitted within 48hrs of landing).  
Commission Regulation (EC) No. 2945/95 of 20th December 1995 (Specifying requirement to record effort reports in logbook).  
Commission Regulation (EC) No. 395/98 of 19 February 1998 (Amending target species and effort zones).  
Commission Regulation (EC) No. 1488/98 of 13th July 1998 (Specifying logbook codes for various species).  
Commission Regulation (EC) No. 2737/99 of 21st December 1999 (Mediterranean Sea Regulations).  
Commission Regulation (EC) No. 1965/2001 of 8th October 2001 (Amending list of Coastal Radio Stations for receipt of effort reports and specifying vessels of 10m or over subject to logbook regulation).  
Commission Regulation (EC) No. 1804/95 of 3rd November 2005 (Amending effort reporting zones Western waters and Baltic Sea).

### Effort Reporting

Council Regulation (EC) No. 2847/93 of 20th October 1993 "Establishing a control system for the Common Fisheries Policy" as adopted by SI 170/2006 Sea Fisheries (Control of Catches) Regulations 2006, as amended by  
Council Regulation (EC) No. 2870/95 of 8th December 1995 (Establishing Irish box).  
Council Regulation (EC) No. 686/97 of 14th April 1997 (Specifying rules for establishment of vessels monitoring systems and FMC's).  
Council Regulation (EC) No. 2205/97 of 30th October 1997 (Establishing VMS as an effort reporting method).  
Council Regulation (EC) No. 2635/97 of 18th December 1997 (Amending effort controls in Baltic Sea).  
Council Regulation (EC) No. 2846/98 of 17th December 1998 (Monitoring, Control and Surveillance of 3rd country waters).  
Council Regulation (EC) No. 1954/2003 of 4th November 2003 (Establishing BSA reporting area).

### Technical Conservation Measures/Recovery Plans

Council Regulation (EC) No. 850/98 of 30th March 1998 as adopted by SI 171/2006 Sea Fisheries (Technical Conservation Measures) Regulations 2006.  
Council Regulation (EC) No. 2347/2002 (Article 5) of 16th December 2002 (Deep-sea stocks).  
Council Regulation (EC) No. 434/2004 (Article 13) of 26th February 2004 (Cod Recovery Plans).  
Council Regulation (EC) No. 811/2004 (Article 10) of 21st April 2004 (Northern Hake Recovery Plan).  
Council Regulation (EC) No. 51/2006 (Annex III Part A (1)) of 22 December 2005 (Annual TAC's and Quotas 2006).
